Revised Price List of Aquatics

FOR 1894.

Before ordering, our patrons will please note the following revision of prices for 1894, and the large list of grand new varieties not described in the general catalogue, all of which have been thoroughly tested by us, and are highly recommended.

Our exhibit at the World's Fair, in Chicago, was greatly admired, and several medals were awarded us for our novelties, some of which will not be offered until next year.

No new catalogue will be issued this year. Edition for 1892, containing full description of varieties, sent free on application.

N. B.—We here give more recent directions for reaching our *Water Garden* in the Cahuenga foot-hills. The Cahuenga Valley Railroad connects with the Temple Street Cable Railway at its terminus, making five round trips daily. Take the cable car forty minutes in advance of the steam car's time of leaving. After a ride of about three miles by the steam railroad to "Grand Turn" Station, a walk of about ten minutes up Western Avenue to the hills brings you to the garden.

Station "C," Box 404,
or, 148 Kern Street.

Bamboos and Grasses same as in 1892.

New and Rare Varieties.

NYMPHAEA GRACILIS.

The habit of this species is similar to that of the blue and purple lilies, except that the flowers stand about 15 inches above the water. They are 6 inches across, and pure white, with deep yellow stamens. The somewhat narrow petals form a beautiful star-shaped flower. It is a day bloomer, very novel and distinct. Tubers or plants, $2.00 each.

NYMPHAEA MEXICANA.

This is nearly a precise counterpart of the well-known Nymphæa Flava. The latter is a shy bloomer. N. Mexicana produces its bright, golden yellow flowers in profusion throughout the entire season. The fragrance is like that of the Locust Tree blossom. 50 cents each.

EURALE FEROX.

This very interesting plant has spiny leaves similar to the Victoria Regia, and, when well grown, about 4 feet in diameter. The flowers are crimson purple, and smaller than those of the Victoria. Seeds, 25 cents each; plants, $7.50 each.

New Hardy Water Lilies.

NYMPHAEA LAYDEKERI ROSEA.

Flowers larger than N. Pygmæa, delicate flesh color on first opening, changing to very bright rose carmine; stamens orange red. Blooms profusely the entire season. One of the most charming varieties ever introduced. $3.00 each.

NYMPHAEA PYGMAEA HELVOLA.

Foliage spotted with reddish brown, flowers pale yellow, somewhat larger than N. Pygmæa, and produced freely. $1.00 each.

NYMPHAEA MARLIACEA ALBIDA.

This grand variety belongs to the same class as N. Candidissima, and bears magnificent pearly white flowers, sometimes 7 to 8 inches across. Blooms both early and late. $2.00 each.

NYMPHAEA MARLIACEA CARNEA.

Plant of the N. Candidissima type, producing large, fragrant flowers of a delicate flesh color—a most exquisite shade. Very desirable. $2.00 each.

NYMPHAEA MARLIACEA ROSEA.

Another grand variety of the N. Candidissima type, with large flowers of the deep, rich pink color, and delicious fragrance of the N. Odorata Rosea. A great acquisition. All the Marliacea hybrids bloom much later in the Autumn than the common Nymphæa Odorata. $3.00 each.

NYMPHAEA ODORATA SULPHUREA.

A hybrid variety, with superb, fragrant flowers of a bright yellow color, standing 6 or 8 inches out of the water. Foliage maculated with rich brown. Plant a vigorous grower and free bloomer. 75 cents each.

NYMPHAEA ODORATA EXQUISITA.

The brightest colored of all the "Odorata" varieties. Flowers of a bright rose carmine, a deeper shade than the Cape Cod Lily. Very fragrant. $2.00 each.

NYMPHAEA ODORATA SUPERBA.

A variety of the common Water Lily, with large flowers of exquisite form, having very broad petals so numerous as to make it semi-double. 75 cents each.

NYMPHAEA ODORATA GIGANTEA.

This is a native of Florida, and said to be "a gigantic form of the common White Water Lily." Our own opinion is, that it is a distinct species. It is a very strong growing plant, with very large white flowers of beautiful form. Very desirable. 25 cents each.

NYMPHAEA ODORATA CAROLINENSIS.

A superb variety which originated with H. T. Bahnson, M.D., of North Carolina. $2.00 each.

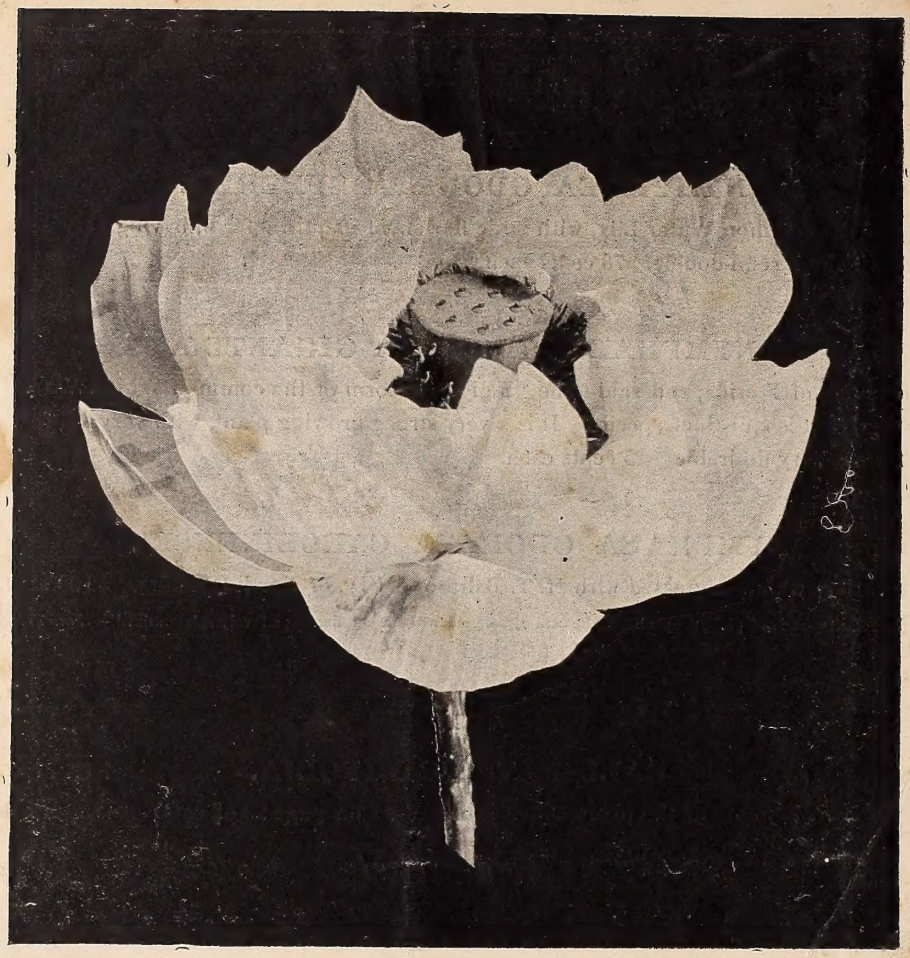
"Flower of a delicate shade of pink, deepening to the center, the golden stamens reflecting a lovely salmon tint."—*Wm. Tricker.*

CABOMBA VIRIDIFOLIA.

This is the correct name of the plant which is described on page 29 of catalogue under the name of "Water Ranunculus." 25 cents each.

SCHUBERTIA GRANDIFLORA.

A grand new climber, which can be planted in the garden during Summer and wintered in a greenhouse, flowers resembling the Stephanoti's (white). Very fragrant, and produced freely in large clusters all Summer. 50 cents each.



DOUBLE FLOWERED WHITE NELUMBIUM, Reduced One-Half.

Novelties for 1894.

NELUMBIUM ALBUM PLENISSIMUM.

DOUBLE FLOWERED WHITE LOTUS.

The two following varieties are the only really double flowered Nelumbiums ever offered for sale in this country, and are among the grandest novelties in aquatics ever sent out. Both are equally as hardy, robust and free blooming as the single flowered kinds. The first is pure white in color, as will be seen by the above excellent photo-engraving; it has *one hundred* petals of all sizes, while still showing the seed receptacle and many yellow stamens in the center. Price, $6.00 each.

NELUMBIUM ROSEUM PLENUM.

DOUBLE FLOWERED RED LOTUS.

This magnificent variety has *eighty* petals of a bright, deep-rose color, similar to the rose "Paul Neyron," the nearest approach to red of any variety yet offered here. Price, $6.00 each.

N. B.—The set of two Double Lotus for $10.00.

NYMPHÆA ZANZIBARENSIS SUPERBA.

This variety, which originated in our establishment, we believe to be the darkest colored form of N. Zanzibarensis in existence. It is a rich, deep purple, with sepals edged with crimson. The plants we offer are not seedlings, but have been carefully propagated from the original plant. It was awarded a medal at the World's Fair, in Chicago. Price, $5.00 each.
